Graduating: May 2027

Bachelor of Science in Computer Science

RELEVANT COURSEWORK: Relevant Coursework: Object-Oriented Programming, Algorithms and Data Structures, Database and Big Data, Introduction to Python, Computer Organization

RELEVANT EXPERIENCE

Software Development Intern, Azuna, Buffalo, NY

May 2026 – Present

- Designed and developed a web-based Production Management System using PHP, MySQL, JavaScript, Bootstrap, HTML, and CSS to replace paper-based production tracking.
- Built a relational MySQL database to manage production runs, hourly weight sheets, downtime events, and operator information.
- Collaborated with supervisors and production staff to gather requirements and translate manufacturing workflows into software features.
- Implemented secure CRUD functionality using PHP, SQL, and prepared statements to create, update, and manage production records.
- Developed a real-time downtime tracking module that records production stop and resume events, automatically calculates downtime, and improves reporting accuracy.
- Tested and refined system features based on user feedback to improve efficiency and reduce manual data entry.
